

Assignment 2:- Daily Standup Simulation - Write a script for a Daily Standup meeting for a development team working on the software feature from Assignment 1. Address a common challenge and incorporate a solution into the communication flow.

Manager : Good morning, everyone. Let's kick off our Daily Standup meeting. As always, the purpose of this meeting is to sync up on our progress, discuss any challenges we're facing, and ensure we're all aligned towards our goal of delivering the software feature from Assignment 1. Who wants to start?

Developer 1: I can go first. Yesterday, I completed the frontend design for the login page. Today, I'll be working on integrating it with the backend API.

Manager : Great progress, Developer 1. Any roadblocks or challenges you encountered?

Developer 1 Yeah, actually. I ran into an issue with the API documentation being outdated, which caused some confusion while integrating. But, I reached out to the backend team, and they're updating it as we speak.

Manager: Thanks for bringing that up. Communication is key, and it's great to hear you proactively reached out to resolve the issue. Let's make sure to keep each other updated on any documentation changes or discrepancies.

Developer 2: I'll go next. Yesterday, I started working on the database schema required for user authentication. I've completed the initial design and started implementing it.

Manager: Excellent progress, Developer 2. Any blockers or concerns you're facing?

Developer 2: Not exactly a blocker, but I realized that our current schema might not scale well with the anticipated increase in users. So, I'm planning to refactor it today to ensure scalability.

Manager: That's a valid concern, Developer 2. Proactively addressing scalability issues early on is crucial. Keep us updated on your progress with the refactoring.

Developer 3: My turn. Yesterday, I conducted some research on third-party authentication options for our feature. I've narrowed down the choices and will start integrating the selected solution today.

Manager: Good work, Developer 3. Any challenges you foresee in integrating the third-party authentication?

Developer 3: Well, I anticipate some configuration complexities, especially with our unique requirements. But I'll delve into it and seek support from the team if needed.

Manager: Thanks for raising that, Developer 3. Don't hesitate to reach out for assistance if you encounter any roadblocks. We're here to support each other.

Manager: Before we conclude, I want to address a common challenge we've been facing regarding unclear task priorities. To tackle this, starting today, let's implement a simple but effective solution. Each morning, before our standup, we'll spend a few minutes reviewing and updating our task board together. This way, we'll ensure everyone has clarity on what they need to focus on for the day. Let's give it a try and see how it improves our workflow.

Manager Alright, that wraps up our Daily Standup. Remember, communication and collaboration are key to our success. Let's tackle today's tasks with determination and support each other along the way. If anyone needs assistance or encounters any blockers, don't hesitate to reach out. Have a productive day, everyone!
